

Big Bag-loading Station

- Calibratable (legal for trade), self-operating weighing
- High performance of up to 30 Big Bags per hour
- Different Big Bag sizes
- One-man operation
- Dust-free loading

The BITZER Big Bag-Loading Station has been designed for automatic volume dosing and weighing. The net weighing result is legal for trade. The Big Bags are attached to pneumatic handle brackets. The brackets in the back move towards the operator.

The Big Bags are loaded at fast feed or slow feed. Self-optimizing dosing electronics ensure that the target weight is reached. The loading and detaching of the Big Bags as well as the transport occur automatically.
